

**Summary:**

The Logic modular solution is a totally flexible toilet system that boasts both the highest standard in luxury, and an ability to be installed in places not accessible to standard trailer and modular toilet technologies. Each component of the system is standalone during transportation making movement into very low accessibility venues an effective solution. Whether you require a single cubicle and a vanity unit for your event for 20 guests, or you're planning a ball for 5000, we can accommodate your needs.

**Key Features:**

- Exterior: Oak Finish
- Interior: Oak and Travertine Marble Finish
- Flooring: Oak
- Lighting: LED Lighting
- Taps: Auto Taps - Infrared, Hot Water
- Basins: Glass Bow
- Vanity Tops: Oak

**Technical Requirements:**

The Logic system can be configured in several ways. Firstly connection to its own standalone system for applications where there is no access to water and waste on site. Secondly connection to mains water and a waste manhole within 300m of the washroom location through the pump station. Finally connection directly to the mains water and directly into the waste within close proximity of the units. Call us for which of these will suit your event best.

**Dimensions:**

	Width	Height	Depth
Cubicle:	840mm	2150mm	1220mm
Vanity:	630mm	2130mm	630mm
Urinal:	1480mm	2150mm	820mm

**Electrical Connection:**

Consumption depending on application. Range between 16amp (A) single phase connection for a small system upwards for larger set ups.
